Assignment: Charge credit card on registration

Watch the Assignment

Note: You don't have to write the test for this yet. We'll take care of that a bit later.

Watch the Solution, part 1

Note: Capybara changed its implementation since we made this video such that if now runs on a different port if you use Selenium.

To make it work, in `spec_helper.rb` , add

```
Capybara.server_port = 52662
```

In config/environments/test.rb, change

```
config.action_mailer.default_url_options = { host: 'localhost:3000' }
```

to

```
config.action_mailer.default_url_options = { host: 'localhost:52662' }
```

Watch the Solution, part 2

Note: this step will cause some specs to fail. You don't have to fix them now - we'll take care of them in the upcoming lessons.
